

## Technology Services Safe Computing

How to Disable Limewire

1. Select **Options...** from the **Tools** menu.

**Tools Menu** 

2. Select the **Sharing** category from the list. Select each of the shared directories from the list and click **Remove**.

Options			
Sharing Downloads	Shared Directories You can choose the directories for sharing files. Files in these directories are displayed in the library.		
Connections Shutdown	C:Documents and Settings'Administrator'Shared	Add	
Chat Player Bug Reports		Remove	
View			

Sharing

3. Click the arrow next to the **Uploads** category, and then select **Basic**. Uncheck the box labeled **Allow Partial Sharing**.

ptions	
Saving Sharing Speed Downloads Photoads Basic	Clear Uploads You can choose whether or not to automatically clear uploads that have completed. Auto-clear Completed Uploads:
Connections Shutdown Chat Blager Bug Reports View Searching Filters	Upload Bandwidth You can set the percentage of your bandwidth devoted to uploads. To turn off uploads, reduce your upload slots to zero.
	Partial Files You can choose whether or not to automatically share partially downloaded files.
	Restore Defaults OK Cancel Apply

4. Select the Slots category under Uploads. Set Uploads Per Person and Max Upload Slots to 0. Click OK.

Options		
Saving Sharing Speed Downloads WUploads	Uploads Per Person Allow this many uploads per person. Uploads Per Person:
