How to Disable Piolet

1. If you are just installing Piolet, you can turn off sharing during installation. In the **Piolet Setup** window click the **Remove...** button.

😗 Piolet	Setup 🛛 🕅
2	Select the folder(s) you wish to share with others. Accepted filetypes are MD3 and OGG.
	This may be a good moment to set the maximum number of uploads you want to allow at one time. Maximum simultaneous: 8
	🔮 Gancel < Back 🕟 Next 🕥 Einish

2. Select all the shared folders and click **Remove**. Click **Close**.

🥑 Remove Folder	
C:\My Shared Folder\	Piect the folder you want to unshare and press "Remove".
1	Remove Shared Folder

3. If Piolet is already installed click the **My Music** button in the main window. Click the **Unshare** button to bring up the same **Remove Folder** window pictured above. Select all the shared folders and click **Remove**. Click **Close**.
