How to Disable WinMX

1. If you are just installing WinMX, you can disable sharing during installation. In the sharing setup window select all shared folders and click **Unshare Selected Folder(s)...**.

hat folders on your hard drive wo	uld you like to share?	
Share New Folder	Unshare Selected Folder(s)	>
My Shared Folder\

2. If WinMX is already installed click the **Shared Files** button in the main window.

3. Hold down the **Unshare Folder** to bring up a menu of shared folders. Select each of them to unshare them.
