

## Technology Services Safe Computing

How to Disable Xolox

1. If you are just installing Xolox, you can disable file sharing during setup. In the **Xolox setup** window, select all the shared folders and click **Remove**.

🗬 Xolox setup	
	Edit your shared folders Folders c:\my downloads
*010#	* If there are any folders on your computer you do not wish to share, please be certain to remove them from your shared folders direct
Cancel	Add Remove Next >

2. If Xolox is already installed, click the button with the hammer and toolbox icon in the main window to bring up the options window.

3. Select the **Share** category from the list. Select all of the shared directories and click **Remove**.
